PROFESSIONAL SUMMARY

Senior Software Engineer with 3+ years of experience building production web and financial technology platforms. Strong backend expertise in Node.js and Express.js, with full-stack delivery using React.js, Next.js, and TypeScript. Practical DevOps and cloud experience deploying and maintaining containerized applications on Google Cloud Platform with Docker and Kubernetes. Hands-on experience with invoice financing, real-time payments, settlement workflows, banking integrations, and blockchain integration within live financial products.

TECHNICAL SKILLS

Backend: Node.js, Express.js, REST APIs, Backend Business Logic, Authentication & Security, Event Handling, Transaction Schedulers

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Material UI

Databases: MongoDB, MySQL, Supabase

Cloud & DevOps: Google Cloud Platform (GCP), GKE, Kubernetes, Docker, Linux, CI/CD, Git/GitHub, Google Secret Manager, Azure Key Vault / KMS, SonarQube, MobaXterm

Blockchain & Web3: Ethereum, Stellar, Starknet, ZigChain, EVM, Smart-Contract Integration, Blockchain Transactions, On-Chain Events

Fintech & Payments: Invoice Financing, Murabaha Workflows, Conversion Models, Real-Time Payments, PSP, Settlement Workflows, Banking Integrations

Integrations: Mansa, Bankislami, zindagi bank, Efficient, Fuze, Third-Party REST APIs

AI: AI Integration / AI Engineering — Currently Learning

PROFESSIONAL EXPERIENCE

Synergic Professionals Limited (SPL) | Faisalabad, Pakistan

Software Developer | January 2023 – September 2023

- Developed backend features and REST APIs using Node.js, Express.js, and MongoDB for the company's web applications.
- Built and maintained frontend interfaces using React, JavaScript, HTML5, and CSS3.
- Implemented database models and queries, and resolved defects across both backend and frontend layers.

Mate-Sol | Faisalabad, Punjab Pakistan

Senior Software Developer / Senior Software Engineer | September 2023 – Present

- Build and maintain backend services and REST APIs in Node.js and Express.js across five production fintech platforms: DeFa, CredMate, InvoiceMate, PSP, and SettleMate.
- Implement financial business logic covering invoice financing, Murabaha models, conversion models, financing requests, real-time payments, and settlement workflows.
- Deliver full-stack features using React.js, Next.js, and TypeScript, with backend engineering as the primary area of ownership.
- Develop banking and third-party integrations, including Mansa, Effie, and Fuze, as well as integrations between internal company platforms.
- Integrate blockchain functionality into financial products, including transaction workflows, smart-contract interaction, and on-chain event handling across Ethereum, Stellar, Starknet, ZigChain, and EVM.
- Deploy and support containerized applications on GCP and Kubernetes, and investigate and resolve production issues across services and environments.

KEY PRODUCTS

DeFa — DeFi-oriented financing platform built around financing facilities, pools, and on-chain workflows.

- Developed backend services and REST APIs for facility management, DeFa pool creation, and pool workflows.
- Implemented blockchain transaction workflows, transaction schedulers, on-chain event handling, and smart-contract interaction across Ethereum, Stellar, Starknet, and ZigChain.
- Contributed frontend and DevOps/cloud work alongside core backend development.

CredMate — Credit and invoice-financing platform used within banking and financial workflows.

- Delivered backend development and financial business logic, including Murabaha models and conversion-model workflows.
- Built platform functionality for banking partners including BankIslami, with partial involvement in Soneri Bank related work.
- Developed frontend features in React.js, Next.js, and TypeScript, and integrated Starknet smart contracts with on-chain invoice functionality.

InvoiceMate — Invoice-financing platform digitising invoice submission, financing requests, and financing decisions.

- Built backend services, APIs, and database structures supporting invoice financing, Murabaha models, and conversion-model logic.
- Implemented banking and payment integration with Zindigi Bank, plus Starknet smart-contract integration for on-chain invoice.
- Developed frontend features in React.js, Next.js, and TypeScript, with supporting DevOps and cloud work.

PSP — Payment service platform handling payment processing and provider integrations (backend-focused role).

- Developed backend services and REST APIs for real-time payment workflows, payment processing, and transaction handling.
- Implemented Mansa and Effie integrations, along with EVM-based blockchain functionality within payment workflows.
- Handled third-party API integrations, database work, and production debugging of payment issues.

SettleMate — Settlement and real-time payment platform connected to PSP infrastructure (backend-focused role).

- Developed backend services and REST APIs implementing settlement workflows and settlement business logic.
- Implemented the Fuze integration for real-time PSP payments and payment transaction handling.
- Integrated SettleMate with PSP systems and resolved production settlement and payment issues.

DEVOPS & CLOUD EXPERIENCE

- Deployed and managed applications on GCP using GKE/Kubernetes, Docker, and Linux VMs, working with clusters, deployments, services, and containers.
- Managed environment configuration and secure secret/key management using Google Secret Manager and Azure Key Vault / KMS.
- Supported production deployments and troubleshooting across environments using application logs, error tracking, and monitoring.
- Used SonarQube for code quality and security analysis, and performed dependency and security scanning to identify vulnerabilities.
- Worked within Git/GitHub pull request and organization-level code review workflows prior to deployment.
- Assisted with CI/CD and deployment workflows across GCP and Kubernetes environments, using MobaXterm for remote server and VM access.

PERSONAL PROJECTS

- Study Byte — Study and education-focused website "<https://studybytepk.online/>".
- Rock Pizza — Pizza ordering website covering menu browsing and order flow interface "<https://rock-pizza-i7ax.vercel.app/>".
- Call App — In-app calling experience replacing the default dialer for incoming and outgoing calls.
- Weather App — Weather application integrating a third-party weather API to display live conditions.

EDUCATION

BS in Computer Science (BSCS) | Chenab College of Advanced Studies, Canal Road, Faisalabad | 2022 – Present (In Progress)

Intermediate – Pre-Engineering | Government Post Graduate College of Science, Samanabad, Faisalabad | 2020 – 2022

Matriculation – Science | Government High School for Boys 144 R.B, Faisalabad | 2018 – 2020

CERTIFICATIONS & COURSES

Full Stack Development | Gamica Cloud, Jinnah Colony, Faisalabad | 2023

LANGUAGES : English — • Urdu — Native • Punjabi — Native
